## About Tarabiza

Tarabiza is a complete reservation, table, event, and guest management system that delivers a world-class restaurant management experience to navigate the process seamlessly, with its fully automated features.

The portal is introduced with a solution to the ever-changing need for hospitality when the restaurants continue to venture into the new pandemic-tainted territory.

We believe in smart solutions and unrivaled hospitality experiences.

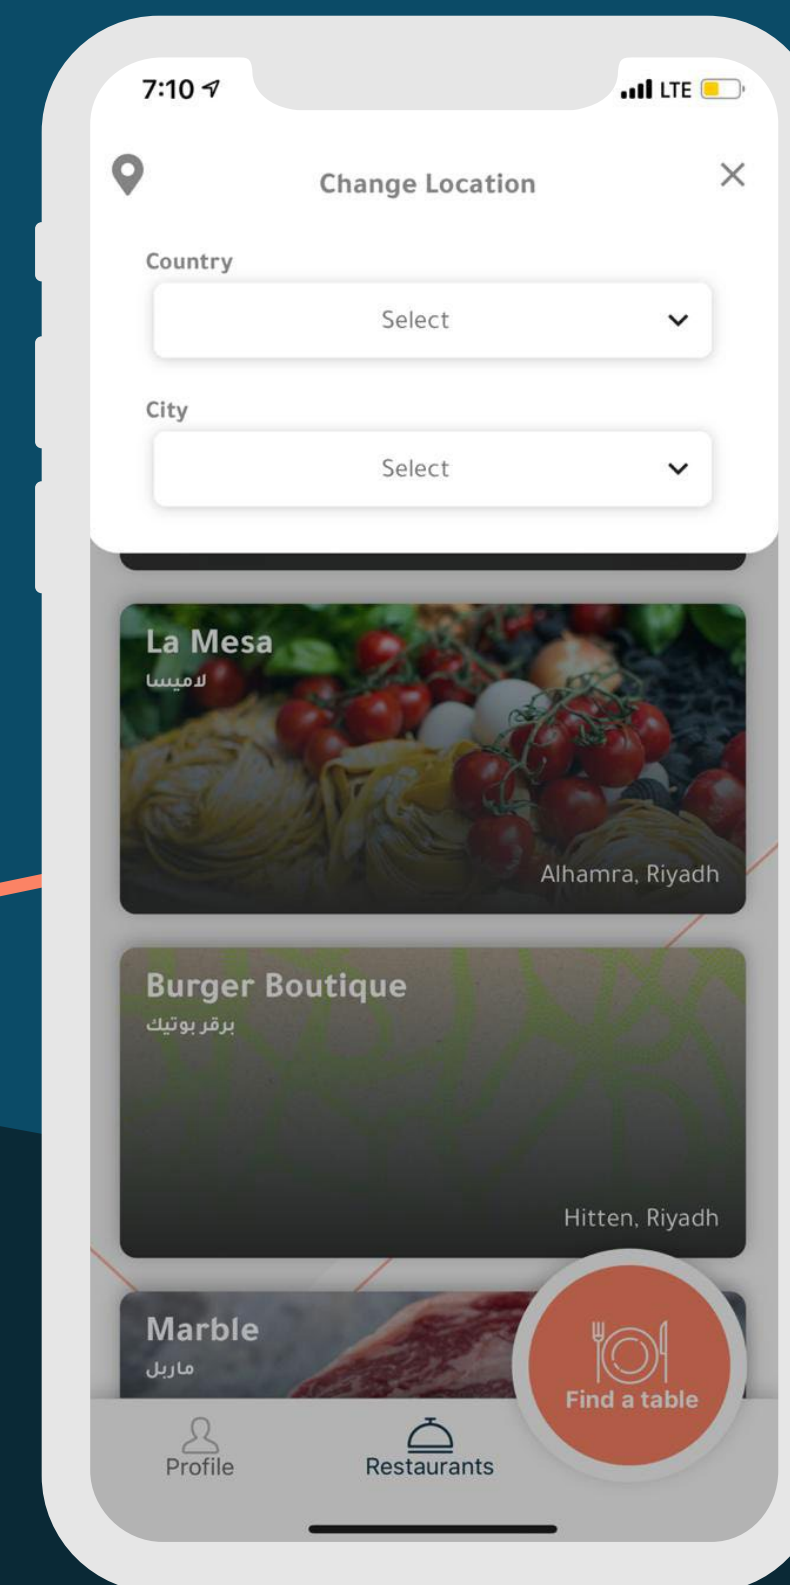

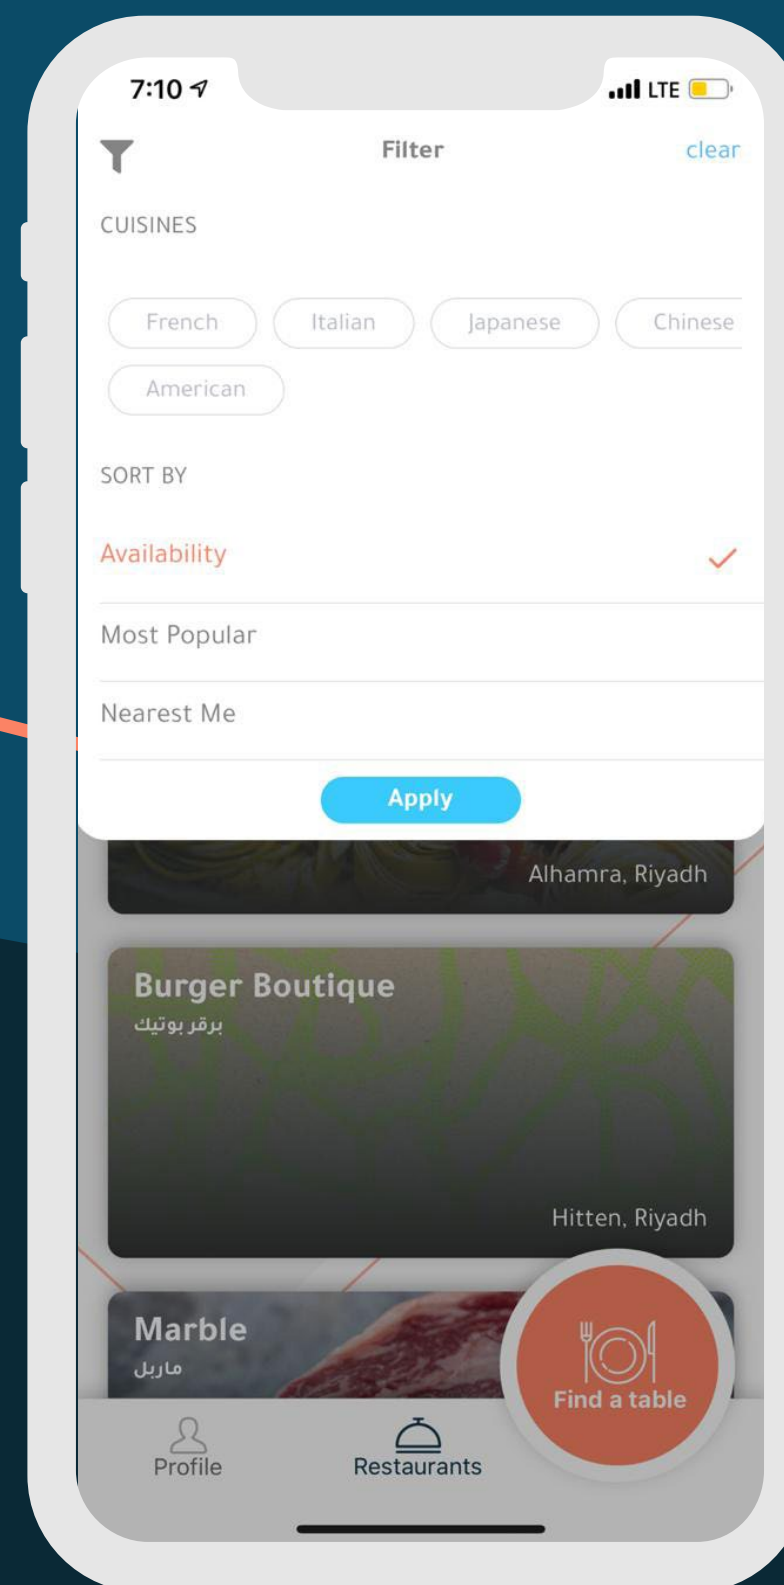

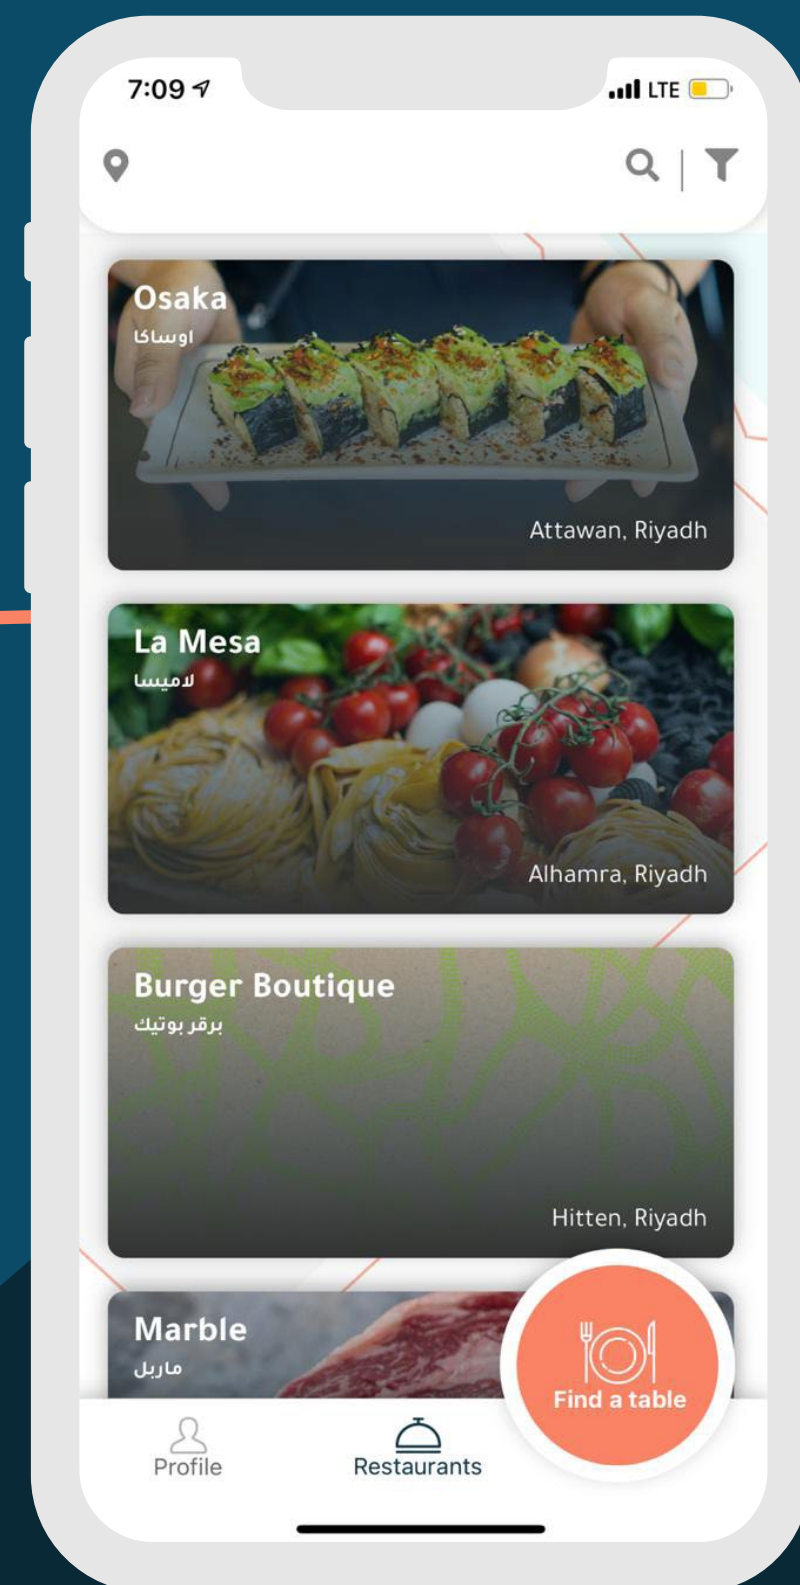

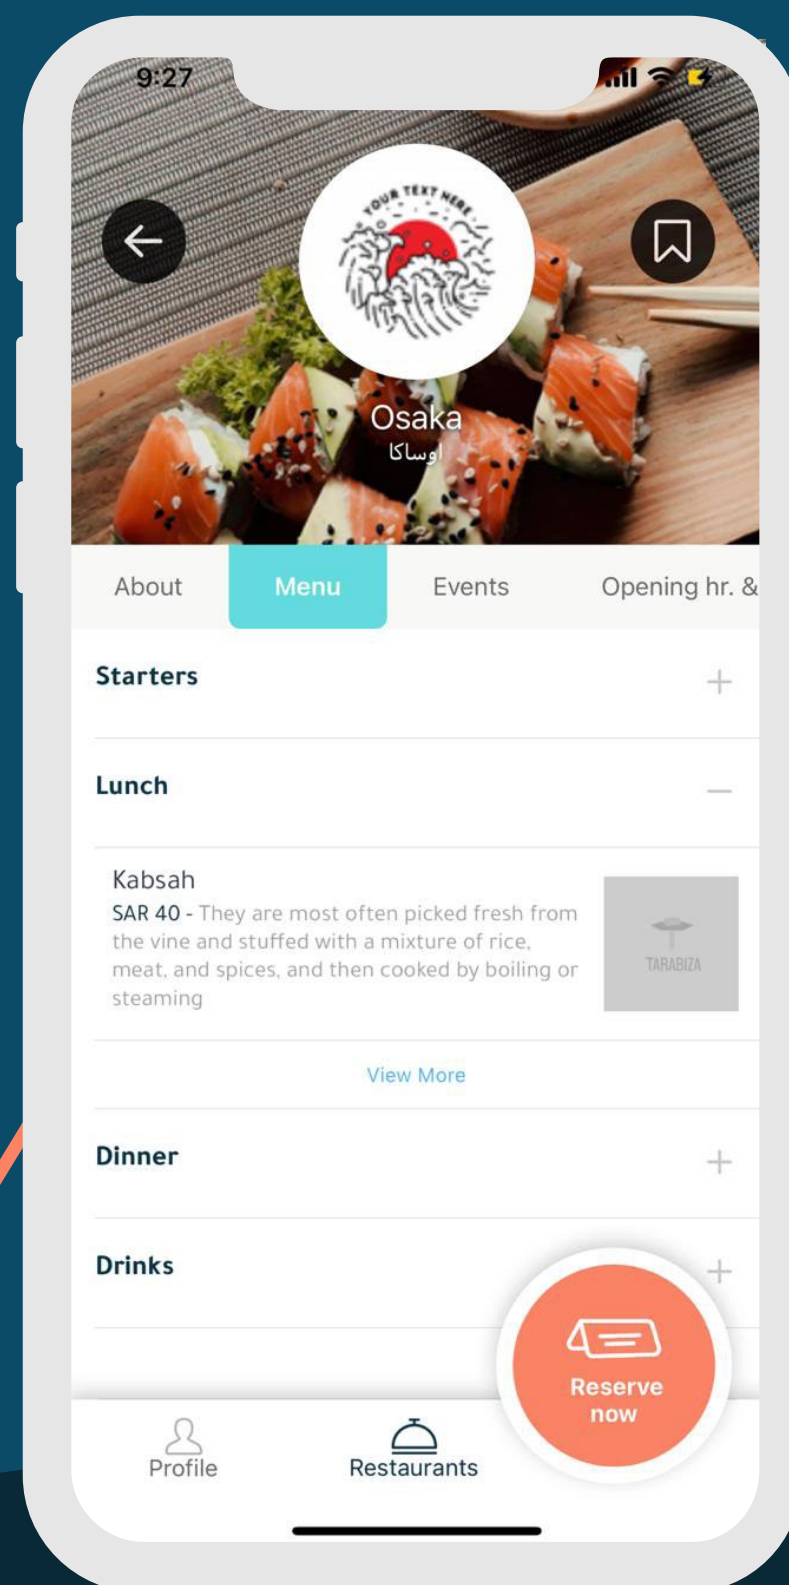

## Vision

Reimagining experiences to support the restaurants and diners in the Middle East in this era of changing trends.

## Mission

The aim is to manage and enhance the solution where diners can spend more time living in the beautiful moments while restaurants create wonderful experiences for their guests without any hassle.

## App Features

Your favorite restaurants in one place

Easy booking process through the mobile app

Check out exclusive deals and special day events

## Systems & Features

Reservation Management

Restaurant Layout Management

Menu Management

Guest Management

Evaluation

Report & Analysis

Offers and Events Management

Survey Management

## Systems & Features

### Reservation Management

Make your every reservation an extraordinary experience. Take control of your reservation process and transform it into a revenue-driven system. Allow your guests to book anytime, from anywhere, and using any device. Engage and grow your network with the customized experience that speaks louder.

The robust guest management technology allows you to smartly manage reservations, cancellations, and modifications with fully-configurable tools.

Compare and analyze the booking frequency across various time periods like day, month, or year.

# Systems & Features

## Restaurant Layout Management

Keep an eye on your floor plan with a flexible table management feature and do not let your guest miss their spots. Manage through the system to review booked tables, adjust the layout or size of the tables, and delegate services and servers accordingly. You may also create multiple layout templates for designated hours.

## Menu Management

Every serving matters! Plan out your servings for the days or hours that best suit your occupancy, order frequency, and the occasional happenings. The feature incorporates all the tools you need to manage your entire menu in terms of dishes, pricings, frequency, or quality.

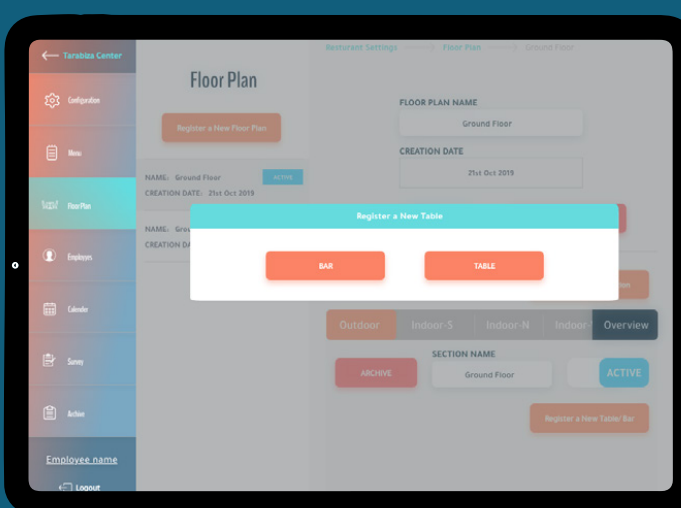

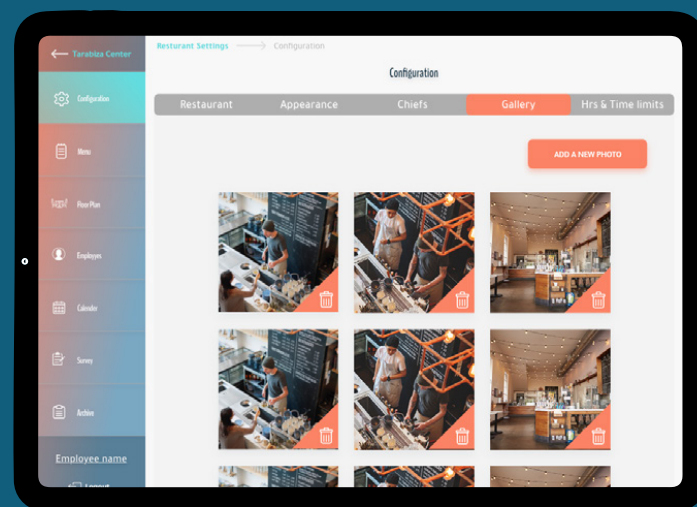

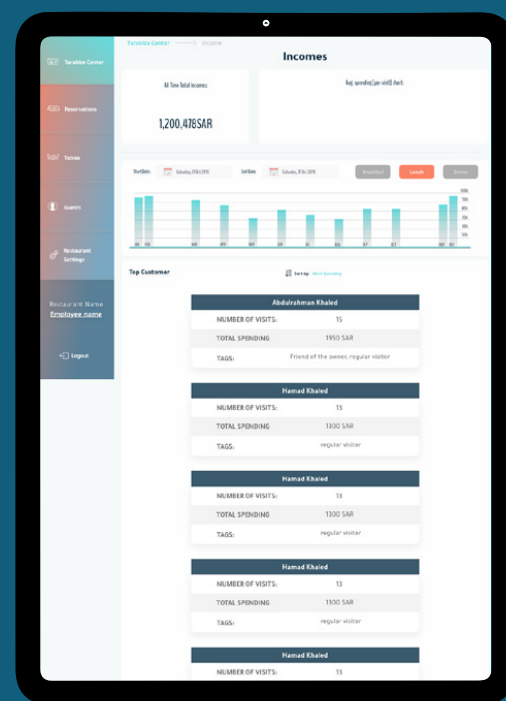

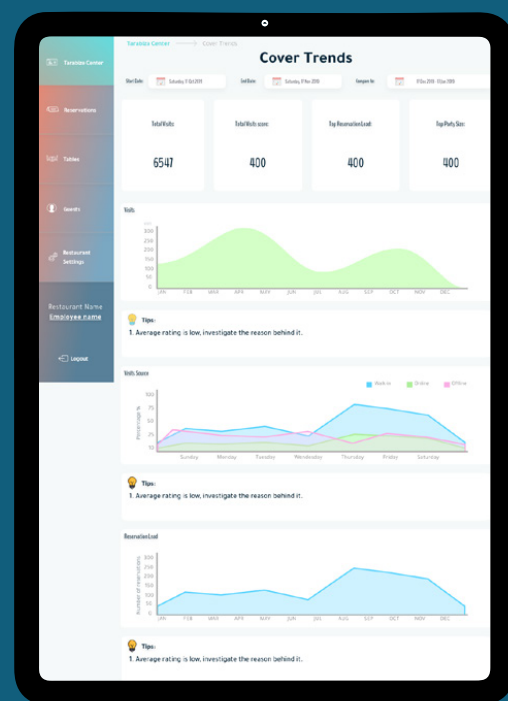

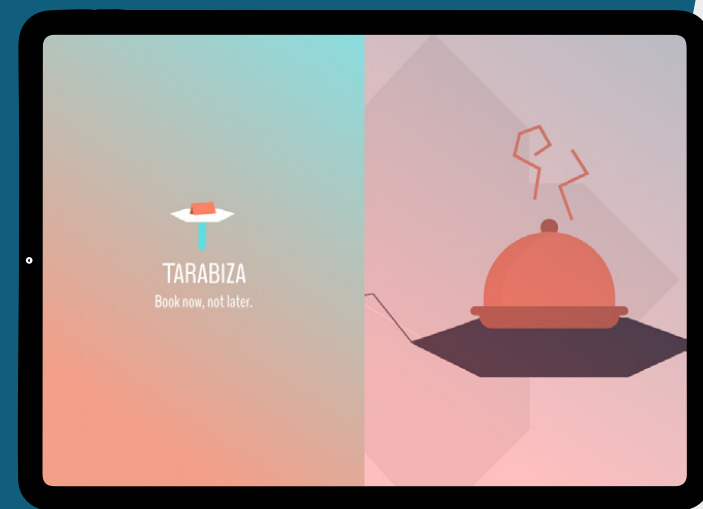

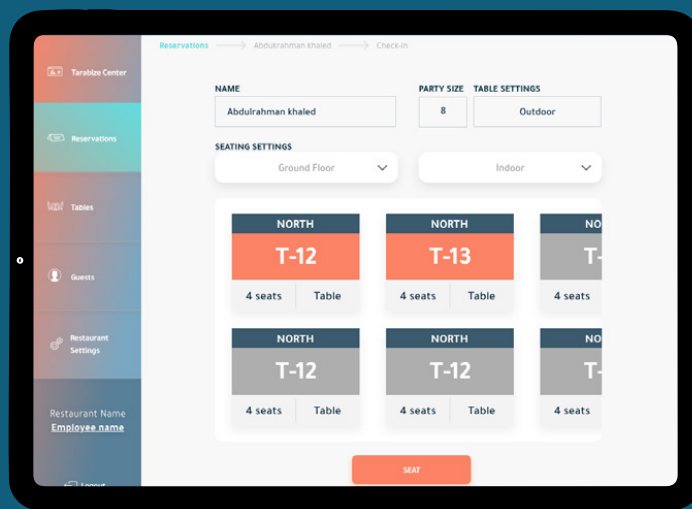

## Guest Management

Transform your guests handling into ultimate fun. Handle your guest management with these automated features. It allows you to give a clear snapshot of the reservations with the complete details of customers, their preferences, history, important notes, and scheduled events.

Send your customers automated alerts to reduce no-shows and get a hold of last-minute cancellations to be filled with the waitlist. Keep a track of tables' occupancy, the checkouts, and the customer's feedback.

## Evaluation

Your customers want to speak to you. Allow them to share their post-service and actionable feedback that eventually leads to comprehensive profiles.

## Reports

Never lose insight into your business. Generate reports to make wiser adjustments in the management process. Bring into your attention the peak hours, most demanding dishes, frequently returning guests, feedbacks and surveys, and much more.

## Events and Promotions Management

Make the reservation process much exciting for your guests by showcasing what more you have to offer and what stands out in your tasteful venture. Inspire them with great ambiance, event setups, free add ons, and some exciting features that could enhance their overall dine-in experience.

## Survey Management

Customizable two-way communication keeps you connected to your guests. Send them surveys through the application using automated features, get feedback, and make them feel valued.

## Features you will have

- Free trial for 2 months
- High-tech automated platform
- Security and maintenance
- Easy-to-use dashboard
- Access to all features
- Fair Pricing
- Increased reach to customer
